

Important: A client, [Good Harvest Bakery](#), will be used throughout this sample submission. You may NOT use the Good Harvest Bakery client for your project.

For the Touchstone Tasks and final Touchstone, you must select one of the three approved clients from the list provided in [Client Scenario and Criteria](#) - Bloom Valley Nursery, ABC Fitness Studio, or Book Haven Bookstore.

Name: Sophia Student

Date: 01/17/2024

Task 3.1: Implementing Dynamic Features with JavaScript

Overview

In this Touchstone task, you will add dynamic features to webpages using JavaScript. You will do this as follows:

- For all pages, add a functional alert window for the “Subscribe” feature in the footer of every webpage using JavaScript.
- For the Gallery page, create alert windows for the “Add to Cart” feature, which includes adding an event handler for the “Add to Cart” button, the “Clear Cart” button, and the “Process Order” button.
- For the About Us/Contact page, create a functional alert window for the web form.
 - The alert windows should be functional and work according to the click events.
 - The alert window for the “Subscribe” feature should display the message “Thank you for subscribing.”
 - The alert window for the “Add to Cart” feature should display the message “Item added to the cart” when an item is added to the cart.
 - The alert window for the “Clear Cart” feature should display the message “Cart Cleared” when there is an item in the cart. If the cart is empty, then the message should be “No items to clear.”
 - The alert window for the “Process Order” feature should display the message “Thank you for your order” when there is an item in the cart. If the cart is empty, then the message should be “Cart is empty.”
 - The alert window for the About Us/Contact page should display the message “Thank you for your message” when the “Submit” button is pressed

Document any issues or errors you encounter in your code development that prevent your JavaScript code from functioning as intended. Remember that any component colors, font colors, and typography styling should be consistent with your choices in Task 1 and should be appropriate according to the client description.

Instructions

Provide your responses in the following table.

Rendered Subscribe Feature Alert Window Screenshot

Hint: Provide the screenshot for the “Subscribe” feature alert window in the footer.

Subscribe Feature Alert Window Analysis

Hint: Provide a brief description about the “Subscribe” feature alert window in the footer.

The footer section of each page has a “Subscribe” feature that inputs the customer email from the user. If the user enters the email and clicks the button, an alert window is displayed to show the message “Thank you for subscribing.”

Rendered Subscribe Feature Input Validation Screenshot

Hint: Provide the screenshot for the “Subscribe” feature input validation in the footer.

The screenshot shows a website footer with a light pink background. On the left, there is a newsletter sign-up section titled "Sign up for our Newsletter". It includes a text input field with the placeholder "Your email", a green "Subscribe" button, and a red tooltip with a question mark icon that says "Please fill out this field." Below this, there is a navigation menu with links: "Home", "Gallery", "About Us", and "Community". On the right side of the footer, there are four social media icons: Facebook, Instagram, Twitter, and YouTube.

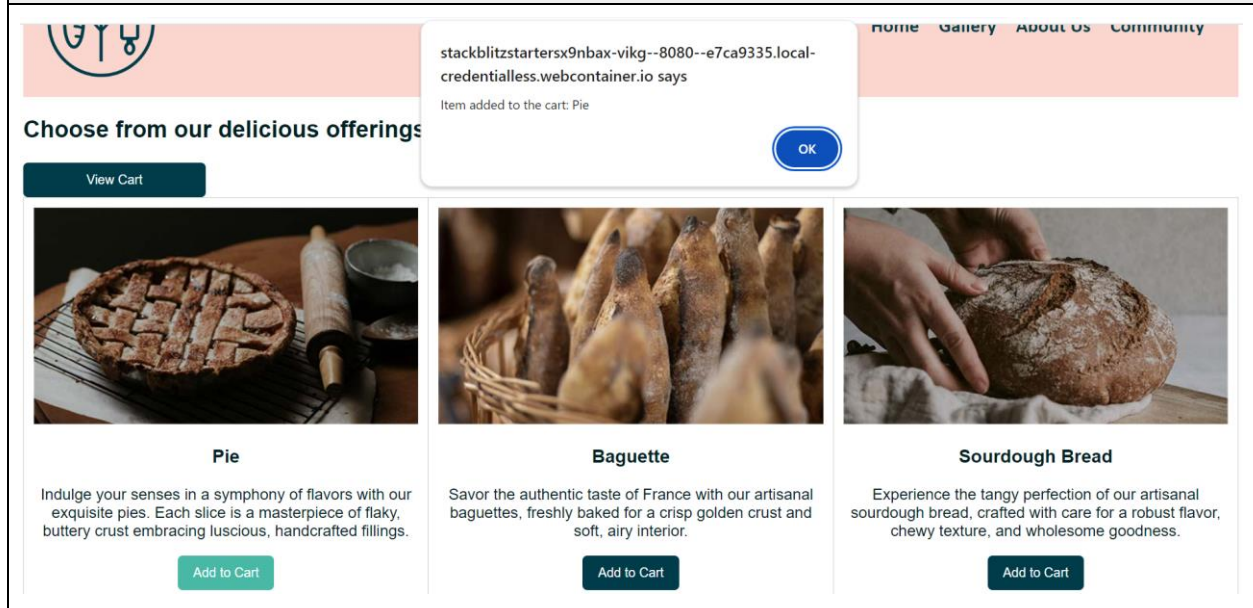

Subscribe Feature Input Validation Analysis

Hint: Provide a brief description about the “Subscribe” feature input validation in the footer.

If the user does not enter their email and clicks the button, an alert window is displayed to show the message “Please fill out this field.”

Rendered Gallery Page Add to Cart Feature Screenshot(s)

Hint: Provide the screenshot(s) for the “Add to Cart” alert window in the Gallery page.

Gallery Page Add to Cart Analysis

Hint: Provide a brief description about the application of JavaScript in the “Add to Cart” feature.

The Gallery page has the “Add to Cart” feature, wherein if the user clicks the “Add to Cart” button for an item, that item will be added to the shopping cart.

Rendered Gallery Page View Cart Feature Screenshot(s)

Hint: Provide the screenshot(s) for the “View Cart” modal window(s) in the Gallery page.

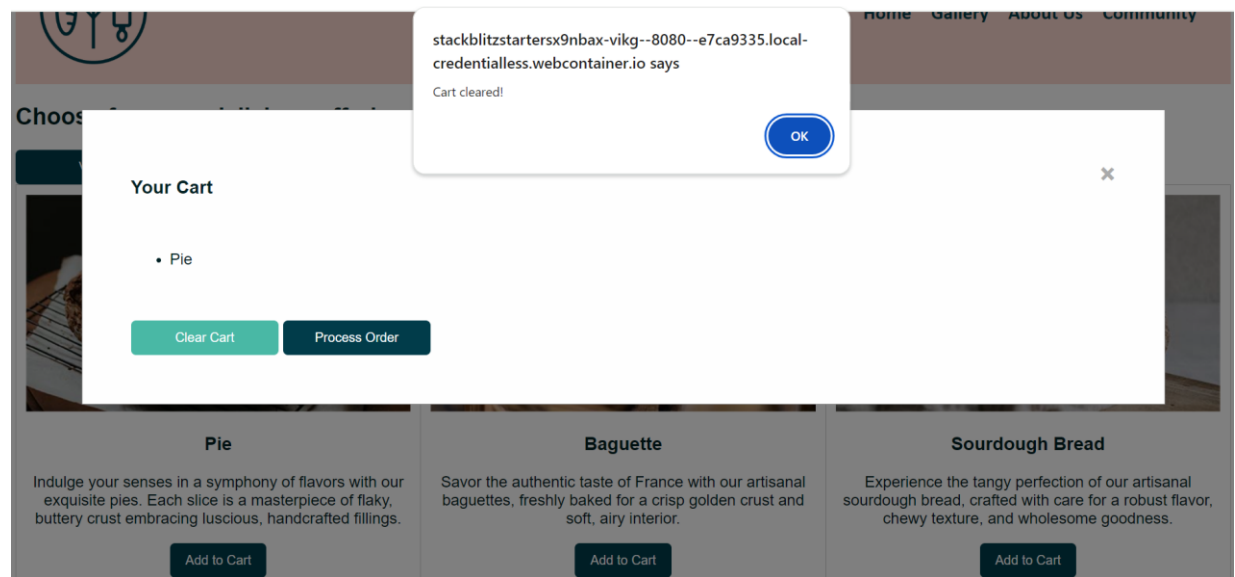

Gallery Page View Cart Analysis

Hint: Provide a brief description about the application of JavaScript in the “View Cart” feature.

The “View Cart” feature opens a modal window that displays the currently added items to the shopping cart. Inside the modal window, the user can either process orders or clear the cart items. If the user decides to process the order, then an alert window will be displayed with the message “Thank you for your order!” Otherwise, if the user decides to clear the cart, then the alert window will display the message “Cart is cleared!”

Rendered Gallery Page Clear Cart Feature Screenshot(s)

Hint: Provide the screenshot(s) for the “Clear Cart” alert window(s) in the Gallery page.

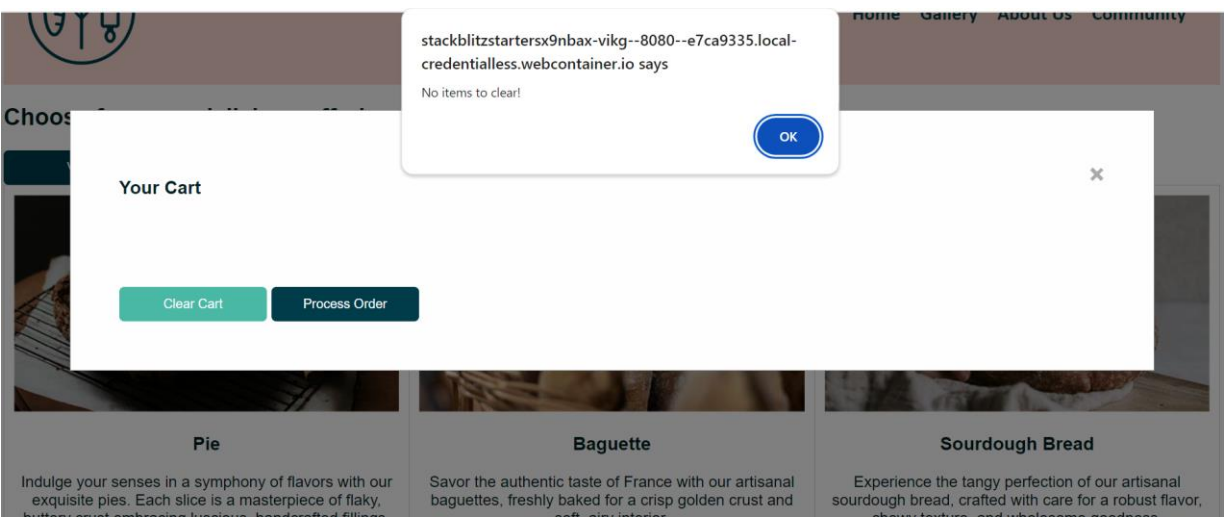

Rendered Gallery Page View Cart (After Clearing Cart) Screenshot(s)

Hint: Provide the screenshot(s) for the cart modal window after clearing the cart in the Gallery page.

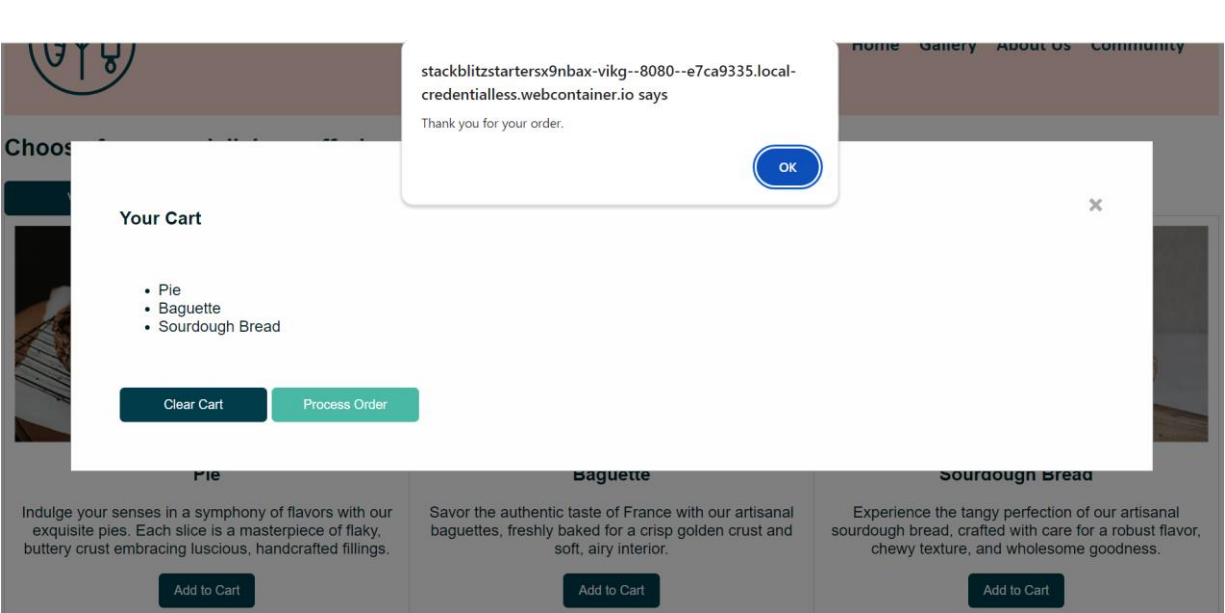

Rendered Gallery Page Clear Cart (After Clearing Cart) Screenshot(s)

Hint: Provide the screenshot(s) for the “Clear Cart” alert window after clearing the cart in the Gallery page.

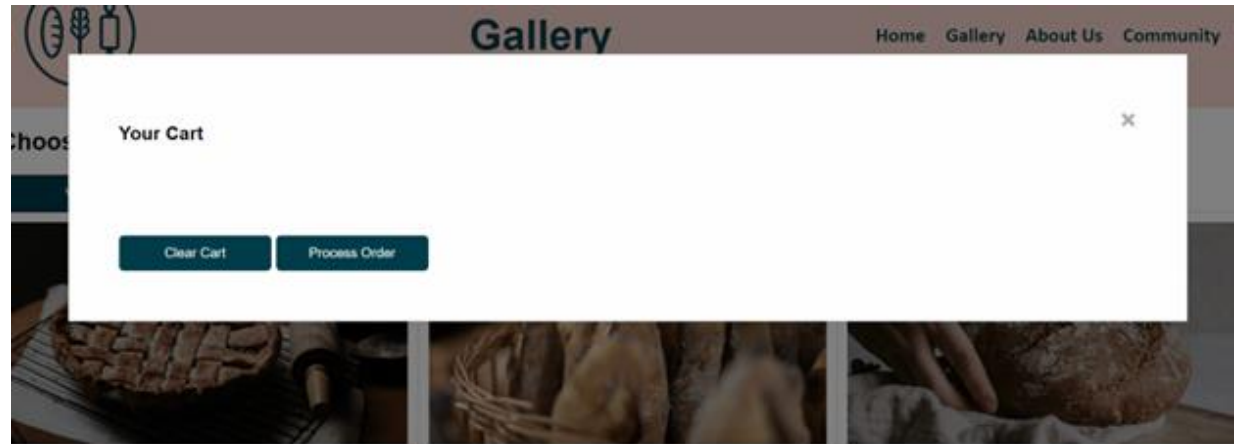

Rendered Gallery Page Process Order Feature Screenshot(s)

Hint: Provide the screenshot(s) for the “Process Order” alert window in the Gallery page.

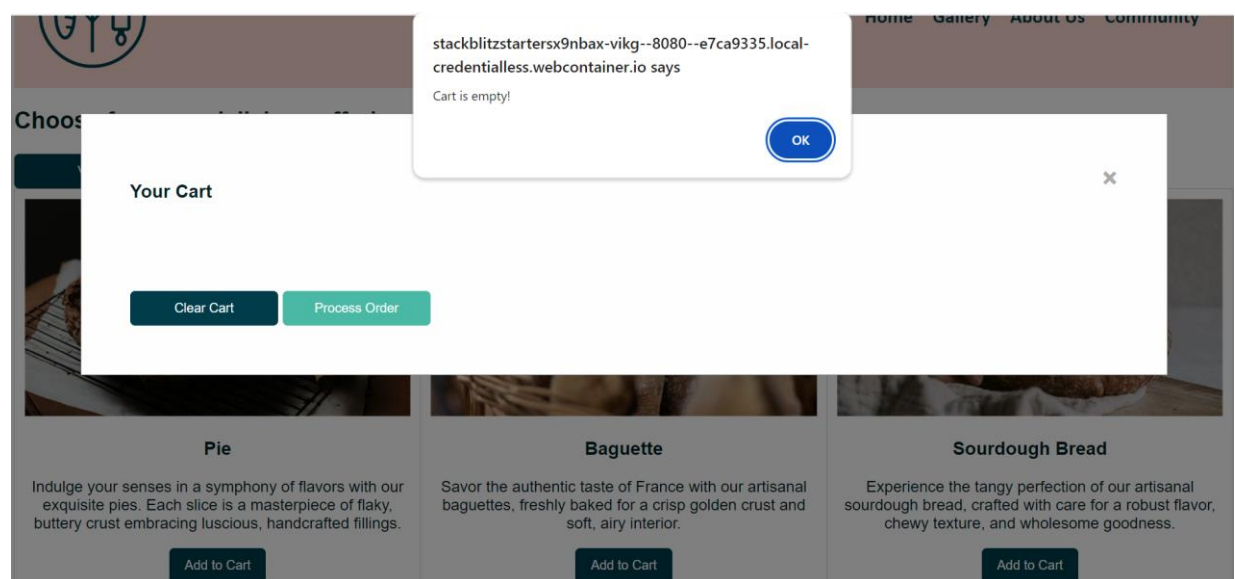

Rendered Gallery Page View Cart (after processing order) Screenshot(s)

Hint: Provide the screenshot(s) for the cart modal window after processing items in the Gallery page.

Rendered Gallery Page Process order (after processing order) Screenshot(s)

Hint: Provide the screenshot(s) for the "Process Order" alert window after processing the items in the Gallery page.

Rendered About Us/Contact Page Form Submission Alert Window Screenshot

Hint: Provide the screenshot for the form submission alert window in the About Us/Contact page.

The screenshot shows a web form titled "Contact Us" with the following fields: "Name:" (filled with "John Doe"), "Email Address:" (filled with "abc123@gmail.com"), and "Phone Number:" (filled with "1234567890"). Below these is a "Feedback/Order Information:" section containing a text area with the message: "Your doughnuts are a pure delight! The flavor and textures are perfect. Thank you for creating such a heavenly treat for doughnut lovers like me!" and a small circular logo. At the bottom of the form is a checkbox labeled "Custom Order". Two buttons, "Submit" (green) and "Clear Form" (grey), are positioned below the form fields. An alert window is displayed over the form, showing the text: "stackblitzstartersx9nbax-vikg--8080--e7ca9335.local-credentialless.webcontainer.io says Thank you for your message, John Doe!" and an "OK" button.

About Us/Contact Page Analysis

Hint: Provide a brief description about the application of JavaScript in the About Us/Contact page.

On the About Us webpage, the user can input their name, email address, phone number, and feedback/custom order information in the form. If the "Submit" button is clicked, then an alert window will display the message "Thank you for your message" including the user's name. Otherwise, the "Clear Form" button will clear the form entries.

Rendered About Us/Contact Page Form Input Validation Screenshot

Hint: Provide the screenshot for the About Us/Contact page form input validation in the footer.

About Us/Contact Page Form Input Validation Analysis

Hint: Provide a brief description about the About Us/Contact page form input validation in the footer.

If the "Submit" button is clicked with all empty fields, then an alert window will display the message "Please enter your name, email, and feedback." If one field is empty, then an alert window will display the message "Please fill out this field."

Testing and Error Reporting

Hint: While writing and testing your code, record any errors, and state your approach to fixing the errors. Did the outcome look the way you expected? Did you find anything particularly difficult to accomplish?

I did not have any issues with my code. All components function as intended.
